1. Write a java program to print all the permutation of entered string.

   e.g. if entered string is "RAM" then the output be like

   RMA

   ARM

   AMR

   MAR

   MRA

2. Write a java program to rotate a n*n matrix in anti-clock wise direction.

   Example for 3*3 matrix

   Input:

1	2	3
4	5	6
7	8	9

   Output:

2	3	6
1	5	9
4	7	8

3. Write a java program to reverse words of given string/sentence word by word.

   e.g. If entered sentence is "I Love India"

   output: I evoL aidnI
